

W2D2 Memo 2.1 (supplement)

29 October 2020

Hello again,

One of our teachers, Luis Alberto Cruz Marquez from Colima, Mexico, sent some good questions that I think are worth sharing with everyone, along with some answers:

1. Is the session on November 6 only for teachers?

Mostly yes. If you have students who are connecting remotely for Nov 12, they can join too to test their connection.

2. When is the page available to analyze the events? To communicate to students?

It is all available now. Here are the steps:

- Go to the Worldwide Google Sheet* and see which datasets have been used so far
- Pick less used data and assign to your students
- Have students go to the ATLAS** or CMS*** page
- They should then watch the videos and go to their datasets in HYPATIA** or iSpy***
- Students record results in the Tally sheet*
- If your students are remote, they can transfer their numbers to the Local Google Sheet*
- Either way, you tabulate the results for the whole class
- Enter in the Worldwide Google Sheet*
- Discuss local results with class.

*** [W2D2 CMS page](#)

3. Do the events already need to be analyzed by November 12 or are they analyzed on that same day?

This is up to you: whatever works best for your class.

All the best,

Ken
